

Product Guide Sheet

Fork Extensions

Our best selling Fork Extension Range fit to a truck quickly and easily. Simply; place the extensions on the truck forks and raise to an angle of approximately 45 degrees. Slide the forks towards the carriage as far as possible. The lower the extensions onto the truck forks, thus allowing the retaining bar to fit behind the truck forks and retain the fork extension. For extensions longer than 2000mm a removable heel pin is provided to aid fitting

Fork Extensions are designed to offer occasional long reach and stabilising capabilities. Allow stable and safe handling of loads which are longer than the truck forks whilst retaining truck manoeuvrability for conventional operation. A superior fork extension with integral retaining bar and fully formed and profiled toe section.
