

**On request we supply special hollow cylinders with pulling capacities up to 600 tons.**

### Hollow cylinders model YCH

Double-acting with hydraulic return,  
33 - 140 t

Basically the applications are the same as for the single-acting hollow cylinders shown on the opposite page but for this model range the return of the piston is done hydraulically by means of the second oil port. These double-acting hollow cylinders are used, when the piston needs to be retracted quickly e.g. with high-cycle pulling applications.

#### Features

- Yale ChroMo-Design.
- Operating pressure max. 700 bar.
- Double-acting with hydraulic return.
- With large centre hole diameter.
- Cylinder body and piston are made from massive chromium-molybdenum steel and heat treated.
- Hard-chromium plated piston with replaceable, heat treated saddle.
- Metric mounting threads at cylinder body and inside of piston.
- Stop ring prevents overtravel of the piston up to full operating pressure.
- Interchangeable hardened saddle.
- With inner and outer dirt wipers.
- Oil port thread: 3/8 NPT.
- Incl. 2 female coupler halves model CFY-1.
- All cylinders with carrying handle, from YCH-62/250 with 2 lifting rings.

**A selection chart “cylinder/hand pumps” can be found on pages 261 to 263.**
