Wall-mounted rack and pinion jacks model ZWW

Capacity 250 - 10000 kg

Wall-mounted rack and pinion jacks are used for lifting, lowering, pulling and pushing of loads.

Features

- Robust steel design with precisely machined worm and spur gears for smooth and easy manual operation.
- Solid steel rack with additional bore hole for fastening of the load.
- Low wear owing to hardened gearing parts and precisely machined teething.
- Suitable for a lifting load of up to 5000 kg for pushing and pulling loads.
- Rigid wall mounting.

Options

- Rack extensions
- Special fastening arrangements for shaft and rack
- Improved corrosion protection owing to zinc-plating, nickel-plating
- Spring loaded safety lock with removable crank (up to 5000 kg)
